Projects

ONLINE MOVIE TICKET BOOKING SYSTEM

· HTML, CSS, JS

Feb 2023 - Apr 2024

Web Development

- The main purpose of our online ticket booking system is to provide an alternate and convenient way for a customer to buy cinema tickets. It is an automatic system. After the data has been fed into the database, the staff does not need to do anything with the order once it is received through the system.

AIRLINE MANAGEMENT SYSTEM

· SQL

Aug 2023 - Oct 2024

DBMS

- This project on Airline Management System is the automation of registration process of airline system.
- The system is able to provide much information like passenger's information, criminal's, list of all passengers etc. The system also allows us to add records when a passenger reserves a ticket.
- For data storage and retrieval we use the file-handling facility of C Language. It enables us to add any number of records in our database.
- But for intrinsic nature of file handling, the retrieval process is slow when we Search a particular record in the database, because record is searched sequentially
